

Content Mobilizer for Calendar

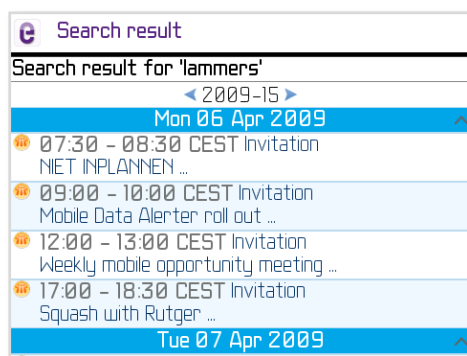

check availability for anyone, any time, anywhere

The perfect tool to quickly check your colleague's availability

We all recognize this setting: you are in a meeting and you need to know the contents of your co-workers' schedules, now!, on the spot! Not knowing their up-to-date agenda, blocks your ability to make good planning decisions, schedule meetings and manage projects. You will find yourself taking numerous phone calls, sending e-mails to get things done and scheduled. That's valuable time wasted! With Content Mobilizer (CoMo) for Calendar, you can browse the agendas of your colleagues using your BlackBerry® smartphone. This enables you to quickly respond to meeting requests and respond to your customers, saving time and money.

Content Mobilizer for Calendar

e-office mobile developed a compact BlackBerry application to solve most of your scheduling problems. A small application using your personal standard webmail credentials will issue a request to the corporate schedules, using the name of a colleague to check the agenda entries of that person. Then the current week is rapidly shown and you will be able to scroll through other weeks back and forth.

feature list

- ✓ search and browse schedules through an extremely fast and intuitive interface
- ✓ works with Lotus Domino (iNotes) and Microsoft Exchange (OWA) infrastructures
- ✓ respects the security policies set in Lotus Domino and Microsoft Exchange
- ✓ in case your webmail pages are not available from the internet a Java component needs to be installed
- ✓ system administrators can remote control most options with IT policies set from the BlackBerry Enterprise Server
- ✓ transparent pricing:

€ 25,- per user per year

available for Domino and Exchange

CoMo for Calendar is available for Lotus Domino and Microsoft Exchange mail users. The webmail option of your mail infrastructure must be switched on (better known as iNotes or Outlook Web Access). If needed, a small Java component on your BlackBerry® Enterprise Server or other computer will facilitate the communication between your colleague's schedules and your BlackBerry smartphone.
